

Bue kazaxme:

Skech me the glassware option.

ChatGPT kaza:

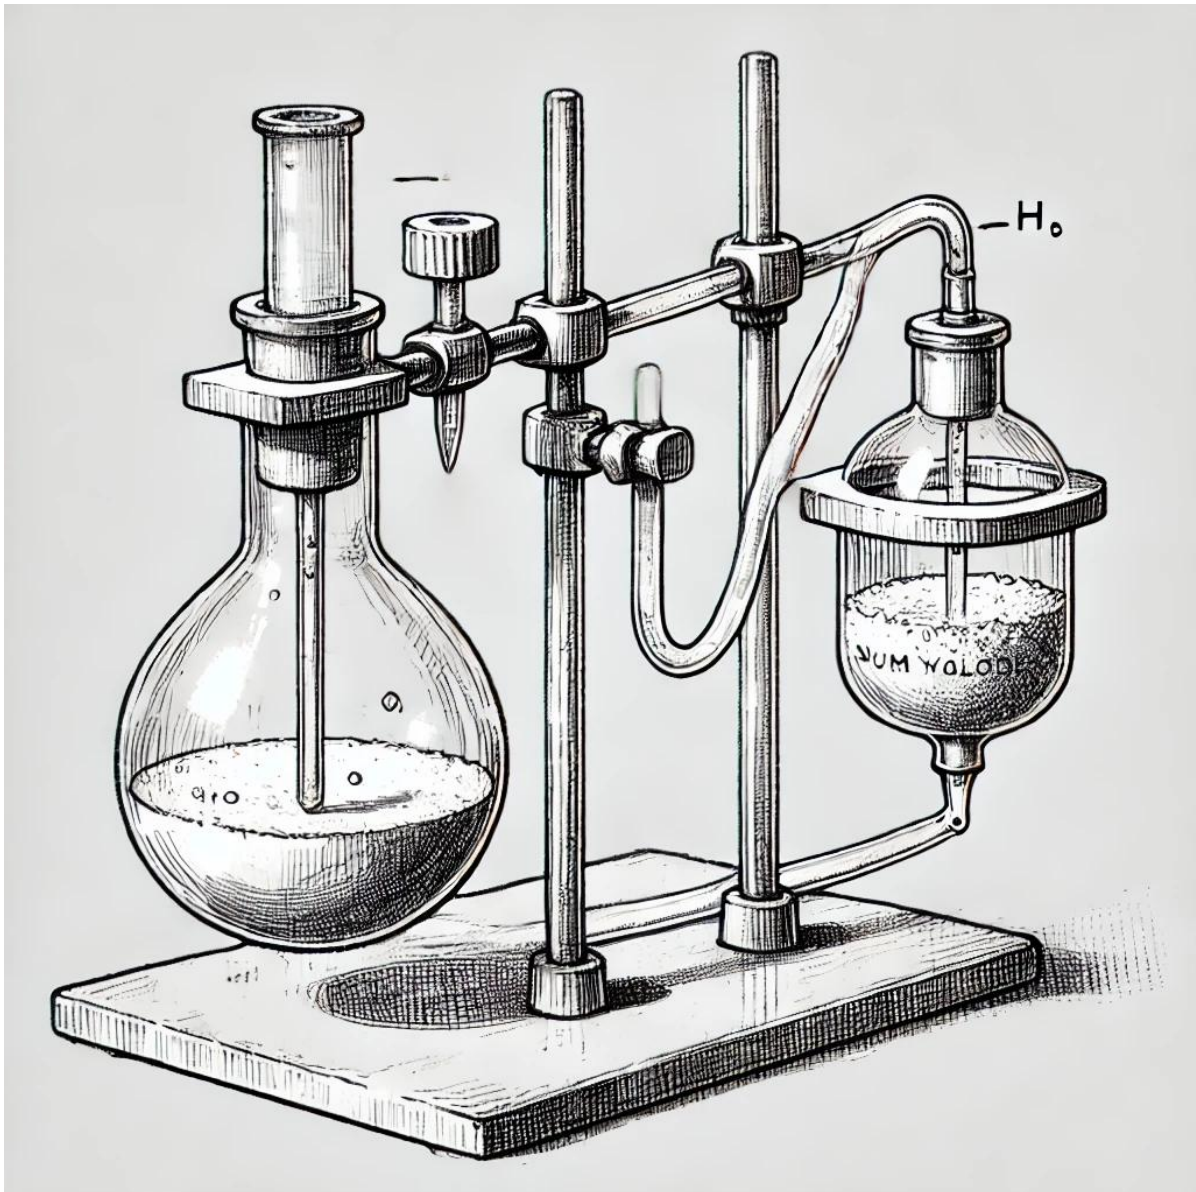

Here is the sketch of the laboratory setup that includes a glassware option to handle toxic gases, such as NO_2 , without a fume hood. It features a reaction flask connected to a gas scrubber system, which helps neutralize the toxic gases before they are safely released.

Бие казахме:

More simple, please?

ChatGPT каза:

Here is the simplified sketch of the basic laboratory setup for handling toxic gases. It includes a reaction flask connected to a bubbler with a neutralizing solution, providing a simple way to absorb toxic gases like NO_2 .
